

ROMOLD[®] LTD

specialist manufacturers of polyethylene products

SPILL CONTAINMENT BEST SELLERS

Quality

As a leading rotational moulding manufacturer, Romold is committed to developing industry best practice that brings innovation and manufacturing efficiencies to keep them at the forefront of their industry.

Romold maintains professional affiliations with standards bodies enabling them to keep up to date and abreast of any legislative or industry changes.

Recycling

Romold is committed to sustainability and lessening its impact on the environment; and to that end has made substantial investment in recycling equipment that allows them to reuse what would previously been waste material. The installation of pulveriser and granulation equipment in their Livingston factory sees "scrap and offcut" material being reused, reducing reliance on virgin material and showing considerable efficiency gains.

DIBt

Tested and approved by DIBt, Germany: Suitable for the storage of liquids that are dangerous for the environment. Products are tested with four times load capacity.

The following products are DIBt approved: ST20, ST30, ST40, ST60, ST66, ST70, ST100, BF2, BF4, BF4S, BP1, BP2, BP4, BP4L, BP8, BP2FW, BP4FW, BP8FW, BB1, BB2, BB3, BB4, BB1FW, BB2FW.

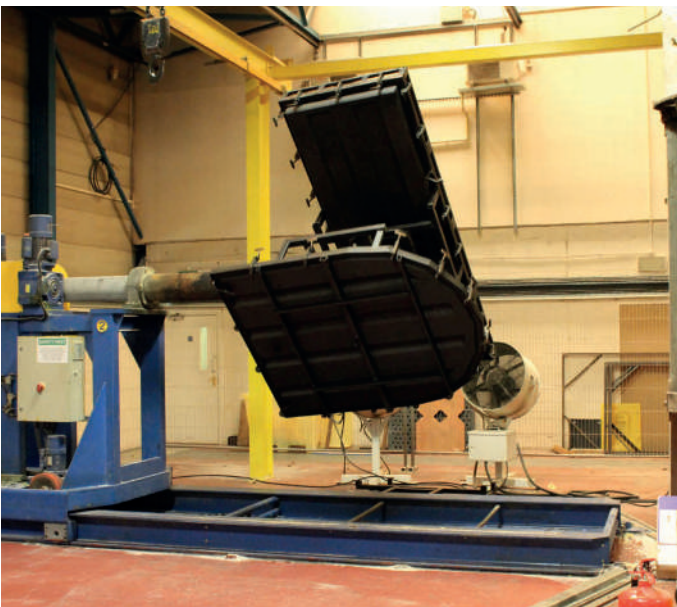

Home of British Rotationally Moulded Spill Containment Products

At Romold we understand the importance of developing long-term relationships with our customers and thanks to our relationships with our extensive distributor network, we pride ourselves on being able to service a global market. Our product offering is constantly being developed and extended and this is due in no small part to the close collaboration between us and our customers.

Specialist Manufacturers of Polyethylene Products

A rotational moulder of environmental storage products, Romold have been designing and manufacturing rotationally moulded products for over a decade. With an ongoing product development programme that enables them to expand the product range and reach new markets.

Quality Management.

Our Quality Management System for product design and manufacture is ISO 9001: 2000 accredited and our commitment to the environment is evident through our environmentally conscious product design, our use of recyclable materials and our ISO 14001 accreditation for Environmental Management.

Spill Trays with Grids

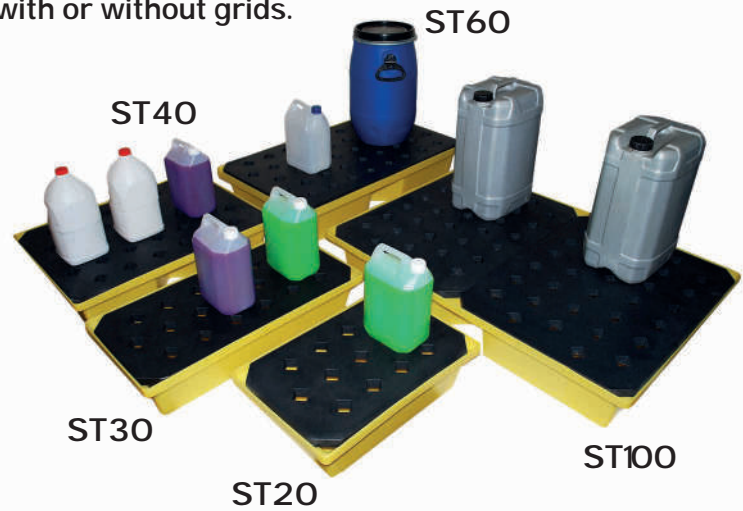

Spill Trays are ideal for catching minor leaks and spills in the workplace and are great for storing smaller drums and containers. Compact and lightweight they can fit into small areas are robust, easy to clean, compatible with most liquids and are DIBt approved

The Spill Tray range can be used and purchased with or without grids.

FEATURES

- Robust and durable
- Low profiles for limited height applications
- Broadband chemical compatibility

With sump capacities up to 104 litres available in a range of sizes our spill tray range provides a practical, easy to use and safe solution to small liquid container storage.

Drip Trays

Compact and easy to clean our Drip Trays provide an excellent liquid dispensing work area, suitable for use with most oils and chemicals.

Drum Workfloors

Our spill flooring range is the flexible decking solution for creating liquid handling workstations and storage areas to fit your working environment.

Great as separate units or combine to create a multiple workstation with a shared sump area. Ramp BFR provides easy access when using a drum trolley.

Drum Trolley for Storage and Transportation

Trolleys with built-in sumps designed to allow you to safely transport drums of liquid around the workplace. Made from sturdy 100% polyethylene they offer broadband chemical compatibility and are lightweight.

Ensure your drums are fully protected even when being transported. Simple to use, one person operation. Dispense without the worry of spills.

Hard Covered Drum Spill Pallets

Our hard covered spill pallets are manufactured from polyethylene which gives them compatibility with a wide range of liquids and they are available in different configurations; 2 or 4 x 205ltr drum storage, small container storage or 1 x 205ltr horizontal drum on a cradle.

FEATURES

- Delivered fully assembled
- Integral fork pockets
- Broadband chemical compatibility

“Models BP2HC can be supplied to accept a padlock (not provided) while model BP4HC has a built-in lock.”

Polyethylene Storage Cabinets

Ideal for storing drums, small containers or for use as a spill kit station or PPE cupboard, our range of cabinets with built-in sumps are manufactured from polyethylene which gives them excellent chemical resistance and durability. Cabinets are available with adjustable/removable shelves, lockable doors and although the standard colour is yellow other colour options are available on a longer lead time.

FEATURES

- Durable construction
- Broadband chemical compatibility
- Lockable doors
